

Prof. Dr. med. Dieter FELSENBERG

Berlin, Germany

Osteologist and Professor of Radiology and Director of the University Ambulance of Orthopaedics, Osteology and Muscles and the Centre of Muscle and Bone Research at Charité-University Medicine Berlin, Campus Benjamin Franklin, Free University and Humboldt University, Berlin.
Email: dieter.felsenberg@charite.de

He studied medicine in Erlangen and Berlin, earning his doctors degree in 1981 after having specialised in radiology.

Professor Dieter Felsenberg founded the Osteoporosis Research Group, the Centre of Muscle and Bone Research, the German Academy for Osteological and Rheumatological Science (DAORW), the Centre for Space Medicine, Berlin at the Free University in Berlin, and the German Society of Muscle and Bone Research (DGfMK).

His laboratory-based work has included examinations of bone architecture and strength, and analyses of the trabecular structure of bone. Research on muscle and bone interaction in immobilization and weightlessness is a further focus in cooperation with space agencies and sports medicine.

His clinical research has included a focus osteoporosis: prevention, treatment, and epidemiology.

He has published and presented extensively on osteoporosis, bone and muscle metabolism, and the biomechanics of bone, with over 300 articles to his name.

He is President of the German Society of Muscle and Bone Research and President of the International Society of Musculoskeletal and Neuronal Interaction. In 2004 he implemented the German Central Register for Osteonecrosis of the jaw. Since April 2011 he became an Honorary Professor of Medicine in the School of Science, Technology and Health at the University Campus Suffolk, UK.

March 2016

Prof. Dr. med. Dieter Felsenberg
